BUREAU OF EMERGENCY MEDICAL SERVICES AND TRAUMA SYSTEM

COUNTY TRAUMA REPORTS:
PIMA COUNTY
ASTR 2012

Prepared by:
Maureen Brophy, MPH
Vatsal Chikani, MPH
Rogelio Martinez, MPH

Data and Quality Assurance

Purpose:

The purpose of this report is to describe the incidence of trauma in your county using the Arizona State Trauma Registry (ASTR). This information can develop and strengthen injury prevention programs at the county level.

Methods:

In 2012, the Arizona State Trauma Registry (ASTR) received data from 31 state-designated trauma centers. Three additional healthcare institutions participated in the registry but were not designated. The Arizona trauma system had eight Level I trauma centers - six were located in the central county of Maricopa with 60 percent of the state's population; the remaining two Level I trauma centers were located in the northern-most county of Coconino and the southern county of Pima. For the 2012 reporting year, there were twenty designated Level IV and three Level III trauma centers dispersed primarily in the rural areas of the state. There are a total of 32,602 records in the ASTR for 2012.

Limitations:

Data is limited to participating hospitals in the state. Information on patients that were treated at out of state and non-participating hospitals will be missed. Injuries included in this registry are those which fit the ASTR inclusion criteria (Appendix 1). As such, injuries reported are reflective of severe injuries, and may not be a complete picture of injury in your county.

Geo-Population:

Arizona is 400 miles long and 310 miles wide for a total area of 114,006 square miles. The topography of the state is 364 square miles of water and a blend of deserts, mountains, and plateaus. Arizona shares contiguous borders with the states of California, Colorado, Nevada, New Mexico, and Utah. Internationally, the Mexican states of Sonora, Chihuahua, and Baja California Norte share a border with Arizona.

The total reported population in 2012 was 6,498,570; this was up from the 2011 reported number of 6,438,178 residents.¹ In 2012, 84.2 percent of the population lived in urban counties (Maricopa, Pima, Pinal, and Yuma). The remaining counties (Apache, Cochise, Coconino, Gila, Graham, Greenlee, La Paz, Mohave, Navajo, Santa Cruz, and Yavapai) were home to 15.8 percent of the population.

Additionally, Arizona has within its borders twenty-two (22) federally recognized American Indian tribes, comprising a 2012 collective population of 305,029.

Statewide, there were 32,602 traumatic injuries seen at state designated trauma centers– a rate of 502 per 100,000 Arizona residents.

Pima County makes up about fifteen percent of the total population of Arizona. Injuries occurring in the county make up about fifteen percent of the trauma cases from state designated trauma centers. The county-specific trauma rate, 497 per 100,000 county residents, is about the same as the state average (Figure 3).

FIGURE 3: County-specific trauma rates per 100,000 residents

FIGURE 4: Frequency and rate of trauma by age, race/ethnicity, and gender in Pima County

Group		Count	Percent	Rate per 100,000
Age	<1	28	0.6%	224
	1-4	107	2.2%	217
	5-9	147	3.0%	239
	10-14	155	3.1%	248
	15-19	440	8.9%	625
	20-24	611	12.4%	793
	25-34	816	16.6%	636
	35-44	607	12.3%	521
	45-54	649	13.2%	512
	55-64	518	10.5%	413

Race/Ethnicity	Hispanic	1,673	34.0%	496
	White	2,588	52.5%	464
	American Indian/Alaska Native	197	4.0%	585
	Black/African American	184	3.7%	520
	Asian or Pacific Islander	56	1.1%	208
Total		4,925	100.0%	497

The trauma rate is comparable in Pima County to the rest of the state for all age groups (Figure 5), except the <1 and >85 groups. The highest trauma rate in the county is among the >85 age group (948 traumatic injuries per 100,000 county residents).

FIGURE 5: Trauma rate per 100,000 residents by age

FIGURE 6: Trauma rate per 100,000 residents by gender

Both males and females in Pima County have similar trauma rates to their counterparts in other counties (Figure 6).

The trauma rate is comparable to other counties for all race/ethnicities except American Indian/Alaska Native, which is lower in Pima County than in other counties (Figure 7).

FIGURE 7: Trauma rate per 100,000 residents by race/ethnicity

Figure 9 shows the top causes of traumatic injury in Pima County, as compared with other counties (rates per 100,000).

FIGURE 8: Frequency of top causes of trauma in Pima County

Cause	Count	Percent
Motor Vehicle Traffic	2101	42.7%
Falls	1108	22.5%
Struck by/Against	492	10.0%
Transport, other	309	6.3%
Cut/Pierce	259	5.3%
Firearm	224	4.5%

FIGURE 9: Top causes of trauma, rates per 100,000 residents

FIGURE 10: Intention of trauma, rate per 100,000 residents

The rate of trauma of homicide intents is slightly higher in Pima County than in other Arizona counties (Figure 10).

Documented alcohol and drug use was present in 19.9% and 11.8% of traumatic injuries in Pima County, respectively (Figure 11).

Alcohol and drug use is defined as any indication of use through testing or self-report, regardless of level of impairment.

FIGURE 11: Substance use in traumatic injuries in Pima County

FIGURE 12: Frequency of substance use in traumatic injuries in Pima County

Substance Use		Frequency	Percent
Alcohol	No	3,941	80.0%
	Yes	982	19.9%

	Air	Ground	Other	Missing
Pima County	210	4,102	613	0
Other Counties	4,414	18,825	4,330	108

The term “golden hour” refers to the hour immediately following traumatic injury. Theoretically, the chance of survival is highest when medical treatment to prevent irreversible internal damage is obtained within this time period.

Due to the large amount of missing data on golden hour, results on the proportion of patients arriving at the hospital within one hour are not conclusive.

FIGURE 15: Golden hour by transport type

FIGURE 16: Count of golden hour by transport type to trauma center

Golden Hour	Air Ambulance		Ground Ambulance		Total	
	Count	Percent	Count	Percent	Count	Percent
<= 1 Hour	49	2.2%	3	0.2%	52	1.4%
> 1 Hour	2,070	92.2%	5	0.4%	2,075	56.5%
Missing	127	5.7%	1,419	99.4%	1,546	42.1%

FIGURE 17: Primary payer in Pima County**FIGURE 18: Count of primary payer in Pima County**

Primary Payer	Frequency	Percent
Private-commercial	1,301	26.4%
AHCCCS/Medicaid	1,240	25.2%
Self pay	1,189	24.1%
Medicare	957	19.4%
Other Government	229	4.6%
Not documented	7	0.1%
Other	1	0.0%
Workers Comp	1	0.0%

Private-commercial is the primary payment source for trauma-related hospital visits in Pima County (Figures 17 & 18).

The median charge in Pima County in 2012 was \$16,923 (Figure 19).

FIGURE 19: Charges & reimbursement by primary payer in Pima County

Primary Payer	Total Charges	Median Charges	Total Reimbursement
Private-commercial	\$40,759,974	\$15,160	\$14,080,179
